Of the total 4,284 are Remington Rand insulated files which are scheduled to be replaced as they wear out; of this total 548 are old style Remington Rands which are not to be repaired but replaced (source - Security Services Section, Physical Security Division, OS).

This compares favorably with stock control records as of 21 January 1971 which lists accountable items as follows:

2 drawer safes	4,391
4 drawer safes	667
5 drawer safes	301
Map & Plan Cabinets	106
Visible Index Cabinets	183
Card Files	442
Single Drawer Safes	29
	<hr/> 6,119

The difference being that Remington Rands were revalued and dropped (under \$100) from accountability.
